

Dear Hiring Manager,

I am writing to express my interest in the Work Integrated Learning (WIL) opportunity or IT Internship within your organization.

I am an Information and Communication Technology student at Tshwane University of Technology. I have completed all my academic modules and am currently seeking a Work Integrated Learning placement, which is a requirement for me to graduate. I am excited about the opportunity to gain practical industry experience while applying the knowledge I have gained during my studies.

Throughout my studies, I developed knowledge in software development, database systems, computer networking, systems programming, software engineering, and web development. I enjoy learning new technologies and solving problems, and I am eager to continue growing in a professional environment.

One of my greatest strengths is my determination. I understand that learning takes time, and when I encounter something challenging, I do not give up. I continue learning, practicing, and asking questions until I understand the task and can complete it correctly. I believe this persistence, together with my strong work ethic and willingness to learn, will allow me to make a positive contribution to your organization.

I am looking for an opportunity where I can learn from experienced professionals, contribute to meaningful projects, and build the practical skills needed for a successful career in Information Technology.

Thank you for considering my application. I would appreciate the opportunity to discuss how I can contribute to your organization while completing my Work Integrated Learning requirement. I look forward to hearing from you.

Yours sincerely,

**Phuti Johanna Manamela**
