

Phuti Johanna Manamela

Software Developer | ICT / Computer Science WIL Intern

066 111 6892 / 076 554 8869 • johannaphutimanamela@gmail.com • GitHub: github.com/Johanna678 • LinkedIn: phuti-manamela-ab558535b

Professional Profile

Diploma in Computer Science student at Tshwane University of Technology with academic modules completed and currently completing Work-Integrated Learning. Practical interests span software development, web and mobile applications, databases, cloud computing, data science, testing and emerging technologies. Demonstrates a strong willingness to learn, problem-solve and contribute to collaborative technical projects.

Education

Diploma in Computer Science — Tshwane University of Technology | 2022–Present

Academic modules completed; currently completing the required WIL placement.

Work-Integrated Learning Experience

ICT / Computer Science Intern — Imvelaphi Technologies Lab | Johannesburg | 01 July 2026 – 30 December 2026

Current voluntary WIL placement supporting practical exposure in software development, robotics and computer science. Placement scope includes assisting with software design, testing and application development (web and mobile), project planning, code reviews, technical documentation, robotics coding and internal technology projects.

Technical Skills

Programming	Java • Kotlin • Python • JavaScript • SQL
Web & Mobile	HTML5 • CSS3 • JavaScript • Android Studio • Jetpack Compose • Next.js • TypeScript
Databases	MySQL • SQLite • SQL • Database design
Cloud & Tools	AWS Cloud Foundations • Git • GitHub • VS Code
Systems	Windows • Ubuntu • Kali Linux
Software Engineering	OOP • Testing • Debugging • Software Engineering • Technical documentation

Selected Projects

- **Lesedi School Management System** — Web-based school management system using HTML, CSS, JavaScript and MySQL.
- **VaultApp** — Secure desktop application using Java Swing and SQLite.
- **CrisisLink 2.0** — Disaster-response platform concept focused on emergency alerts.
- **Junks Electrical Solution** — Responsive service platform built with Next.js and TypeScript.
- **Android Tip Calculator** — Android application built with Kotlin and Jetpack Compose.
- **Soil Analysis Web Application** — Web application using HTML, CSS and JavaScript.

Certificates & Training

- AWS Academy Cloud Foundations — AWS Academy Graduate (2024)
- SQL and Relational Databases 101 — IBM / Cognitive Class (2025)
- Data Science Tools — IBM (2025)
- Data Privacy Fundamentals — Fireside Analytics Inc. / Cognitive Class (2026)
- Getting started with MySQL command line — IBM / Cognitive Class (2026)
- Data Analysis and Visualization Training Program — Wise Insight / Chongqing Dianjiang Vocational Education Center (2026)
- Mpumalanga Artificial Intelligence Student Hackathon — Certificate of Attendance (2024)

- Additional certificate shared through Adobe Acrobat — verification link available in portfolio

Achievements & Activities

- DED Ambassador
- Participated in the Maish Hackathon twice; awarded during the second event.
- Completed CISIR and NITheCS Summer School.
- Active in Netball and Morabaraba.
